

I support the FRS filing that is currently in process for review at the Commission. The misuse of the FRS radio service has harmed the original intent of separating the 14 channels. First the business users complained of the recreational users on business frequencies and now the business users are misusing the FRS. I believe that the wholesalers and mass marketers, Wall Mart, Radio Shack, Grainger are also to blame for not complying with the intent of the FRS service. Please act positively on the RM-10564 proceeding. Dave Hoffangle
